

Clinic Handout for:

BONDING AND FILLING FOR MODEL RAILROADING

by Jim Walsh

Some General Advice

for Best Results

- Read Instructions and understand the product
- Follow safety warnings
- Allow time for full cure
- Clean nozzle and replace cap right away
- Don't overdo the glue – apply it sparingly
- Spills and accidental application can ruin the project
- Liquid solvent cement evaporates quickly
 - Limit the time with the cap removed
 - Replace the cap and close tightly

for Your Safety

- Follow safety warnings on the packaging
- Be careful of super glue on your fingers
- Watch out for super glue fumes and eyes
- Take precautions when using hot glue

When looking for products for model railroading and model building, be sure to visit your local hobby shop.
